Dear Fellow Georgist:

President Reagan needs to know that some of his ideas, in the proper context, are not necessarily bad. Even if his motives are not clear or do not agree with ours, we can still align with him and support him when something he says is germane.

I invite you to add impact to my message with your own message to him. Right now, the economy is very much on his mind. I also ask you to be ready to provide any backup information or even a demonstration of solidarity in your area in case there is a request from the White House regarding the Georgist position in the world.

I shall contact him until I get a reply.

I apologize for not getting this to you within seven days.

Would you carbon me on any messages sent to Washington? I did this out of my conviction that Land Value Taxation is an idea whose time has come. And it is because I say so. Won't you join me in this. It is the way to make a difference-

Yours for economic justice,

Nan Braman
