Dear Miss Denbigh,

Many thanks for your extremely interesting letter about ENGLISH JOURNEY. I am, of course, already familiar with the work of Henry George. He still has a good many disciples in this country. Although I agree with his views on the land question, I do not believe - as most single tax people do - that this is the beginning and end of everything.

My book has been very well received in America and seems to be making friends everywhere, but I am hoping that it will reach far bigger figures than it has done so far.

Yours sincerely,
