The Meaning Of Land.

Political Economy

Here one word, LAND,
To represent all Nature's gifts,
Not just a place to stand.
It means all natural forces, -
Whatever God creates;
All wildlife in the woods and sea,
Have man and what he makes.
By use of treasures in the earth
Men labor to make wealth,
Their efforts prove it's theirs alone,
For happiness and health.
But LAND mankind cannot produce,
It's here for all to share;
It should not be monopolised
No more than light or air.
