Henry George

By Glen P. Dutton

Arthur Caylor's column dated Sept. 8, notes that San Francisco officially commemorated Henry

George Day. This is fitting since George was instrumental in effecting many social reforms for our city.

No other American reached the eminence or achieved the worldwide acclaim of the immortal political economist.

George has been criticized as a credulous visionary whose economic axioms were qualified by his humanitarian approach. This puerile nonsense may be dispelled by a short study of George. It is my conviction that in these troubled times as never before is there a need for the George approach.

As a member of the Henry George school I wish to give thanks to Mr. Caylor for his cogent if humorous observations on our mentor.
