Dear Bob

The enclosures may be of some use.

1. Effective Voting is a thesis on Proportional Representation from a Georgist viewpoint, also demonstrating why good government is virtually impossible with single member electorates. When "first past the post" counting also applies, the matter is almost hopeless.
2. Commentary on Chapter 32 of McConnell's "Economics" (Jackson edited for the Australian publication). This might be used for circulating to universities.
3. Letter to the Church of England which has received favourable comment here.

Please note that the word "martyr" was wrongly spelt in my letter to you dated 16 September 1981.

Kindest regards

Graham Hart
