

2/1/81

Dear Bob,

I forget to say that I think one of the best things that has happened to our movement is your retirement and being able to devote more time to this work. Thanks, + good luck.

About my article again, the last TP can be reworded better, if you are using it. It can go something like this: "So what can we do? Let each and every one of us propagate this thought that every man, woman, and child owns so many acres, not just figuratively, but literally. This idea, written about and spoken in every possible manner and form on every possible occasion will penetrate the minds of the people who will then effectively demand and obtain this fundamental natural rights."

The third party idea may or may not be used.

Regards, Sam

4-932

Dear Bob, Thought you'd like to see this program
I'm not expecting anything much however.
We'll see.
Sam.

FARMINGDALE LIONS CLUB

JANUARY-----FEBRUARY

- JAN. 13 GENERAL MEMBERSHIP MEETING AT THE CONKLIN HOUSE STARTING AT 8 PM.
FROM 7:30 to 8, lecture by Sam Scheck.
- 27 TRI CLUB MEETING AT THE CONKLIN HOUSE STARTING AT 7:30. this will be a joint
meeting between our club, the Copiague club and the Amittyville Club. We
expect to have anywhere from 30 to 45 Lions present.
- Feb 10 General membership meeting at Conklin House at 8 pm. From 7:30 to 8,
lecture by Sam Scheck.
- Feb 24 General membership meeting at the Conklin House at 8 pm. From 7:30 to 8,
lecture by Sam Scheck.

WRITTEN BY DR. SAM SCHECK

Dr. Sam Scheck, hobby political economy, lifetime involvement with the Henry George School and the Henry George Institute as student and teacher and one time member of the Board of Directors of the institute will moderate a seminar in fundamental education in democracy and natural rights of man. It will be conducted at 7:30 pm and will end promptly at 8 pm on every meeting night. Wives and guests are welcome.

Dr. Scheck was aroused by the recent increase in crime. He feels that we must try to do something really basic to reverse the deterioration of our society.

The first topic will be "natural rights of man". The phrase "human rights" expounded by Carter is a take off from the phrase "civil rights" of the early 60s. Our own Declaration of Independence said that "we hold these truths to be self evident, that all men are created equal, that they are endowed by their creator with certain inalienable rights, that among these are Life, Liberty and the pursuit of happiness. No mention was made that man had equal rights to the earth.

Consider that the area of the earth is 196,938,000 square miles. 640 acres to a square mile; 4,100,000,000 people; land area is 57,500,000 miles. This gives us 36 acres of land per family of four, not to mention the wealth in the oceans which is the common inheritance of man.

These concepts will be explored and others like it in the future. Definitions of economic terms will be derived and also Natural Laws of Rent, Wages and Interest. Far-reaching consequences and thoughts may be expected. Are you willing to explore the Earth with Dr. Scheck like Dr. C. Sagan the Universe?

At our last Board of Directors meeting held at Lion Defendini's house on December 18, the Board voted to allow Lion Sam Scheck to hold a nonpolitical discussion group on meeting nights. This is of course purely optional and must not interfere with the regular meeting which starts at 8:00.

Happy Holiday & a healthy New Year to all

So what can we do? Let
us assert in no uncertain
terms our natural right to
our share of the heritage of the
earth. We are here on Earth
not merely to preserve the Earth.
The Earth is also here to
preserve us. Let the word go out
loud and clear that if we do
not get our natural inheritance
of 40 acres (in the U. S.), we at
least want the benefits that can
be derived from them. It's as
simple as that.

12/2/80

dear Bob,

I hope I'm not bugging
you with reprints of little
compositions. Something of them
may be worthwhile.

I have found no resistance
to my example of the average man's
share of the Earth. The next question
is how to do it with equality.
I say, "In the house of our Lord there are
many rooms." Hence, ~~that~~ we will
explore the next room next time.

We'll see how it works out.
In the meantime I have this 1/2 hour
preceding the regular business meeting
on the 2nd & 4th Tuesdays of each
month of the Farmigdale Lions Club.
Also the Friends, Jan 2, at 8:30 PM
at the Farmigdale Jewish Center.

I'm sending a reprint of
the Dr. Carl Sagan view of the Earth
to Tuesday & perhaps The Times.
I appreciated your Christmas Card.
Best regards, Sam

without which the previously mentioned nightmare largely nullified

Dr. Samuel Schuck, hobby political economy, life-time involvement with the Henry George School of ~~the~~ and the Henry George Institute as a student and teacher and one-time member of the Board of Directors of the Institute, will moderate a seminar in fundamentals of education in democracy and natural rights of man. It will be conducted at 7:30 PM at our regular Lions Club meetings. Wives and guests are welcome. It is advisable for love birds to do this together to avoid friction at home.

Dr. Schuck was aroused ~~to action~~ by the recent increase in crime. He feels we must try to do something really basic to reverse the deterioration of our society.

The first topic will be "natural rights of man." The phrase "human rights" espoused by Carter is a take-off from the phrase "civil rights" of the early '60s. Our own Declaration of Independence of July 4th 1776 said that "~~all~~ We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness."

~~no~~ mention was made that man had equal rights to the Earth. Consider: the area of the earth is 196,938,800 square miles; 646 acres to a square mile; 4,100,000,000 people; land area alone is 57,500,000 square miles.

This gives us 36 acres of land area per family of four, not to mention the inestimable wealth in the oceans which is also the common inheritance of man.

John Mace has already picked his 36 acres in the Bahamas. Where do you want yours?

This economic thought will be exploded, and others like it in the future. Definitions of economic terms will be derived and also Natural Laws of Rent, Wages, and Interest. Far reaching thoughts and consequences may be expected. Are you willing to explore the Earth with Dr. Schuck like Dr. Carl Sagan, the Universe?
