

## A HOLISTIC APPROACH

We need a unilateral freeze on all arms. Honest authorities would not trade arms with the Soviets, who, if they had superiority, would now blackmail the world. Only the insane, furthermore, could envision living in their own, or profiting by conquering a nuclear desert. THE LAST EPIDEMIC. We must stop building, and phase out all nuclear power plants - unneeded, too expensive, subsidized, unreliable - down much of the time - deadly to operate, especially to repair; uninsurable, no safe waste disposal, requiring an armed camp to protect, at all stages, and in perpetual quarantine of old plants and waste - a cover for creating nuclear arms fuel. NUCLEAR POWER: BOTH SIDES. We can, with safety and humanity, unilaterally end our neocolonial robbery, throughout Latin America, the Philippines, Indonesia and elsewhere, by our military, or by arming and financing others favorable to our robbery; and by trading freely with, and aiding the Third World to develop economic democracy; minimizing their emigration, and the incentive to war and domestic disorder. When popular demand forces all to do so, arms can be reduced to domestic needs - also greatly reduced.

We must develop a COOPERATIVE OWNERSHIP OF THE EARTH, through FULL ASSESSMENT OF GROUND RENT - created by nature, population and community development - indisputable, from area plat, costing only 5 % to collect - WITHOUT EXCEPTION, progressively, over five years, for most local, and some state and federal revenue; absorbing this "unearned increment" - whose capitalization is sale price - making all sites available at nominal cost; assuring surplus work and residence opportunities, so that ANY DISCRIMINATION WILL BE IMPOSSIBLE: resulting in conversion of corporations into cooperatives, partnerships, individual firms; with government operating all natural monopolies - everything in limited supply - credit, insurance, utilities, rails, local transport, natural resources - requiring minimal adjustments, and supervised by grass roots ombudsmen. Improvement taxes to be reduced correspondingly, and phased out, along with taxes on personal property - limitless taxes on the same labor products. House taxes equal its cost.

Subsidies, tariffs, import quotas, merger benefits, investment tax credits, accelerated depreciation, depletion allowances, and other favors must end, leaving no unearned incomes. AMERICA, INC.; POWER, INC. We can then have a flat income tax on all business, and on personal incomes above a certain level; until a just world allows governments to live on ground rent alone; as did that of William The Conqueror, until the Magna Charta permitted the gradual shift of revenue to labor taxes, rent providing only 4 % by 1845; and as envisioned by the French Physiocrats, and effected, substantially, by Sir Stamford Raffles, during British control of the Dutch East Indies, and in the Colony of Singapore. Conglomerates are inefficient, surviving by not competing. Large cities must be subsidized, requiring deeply buried layers of utilities, deeply sunk foundations for tall buildings, excessive highway, parking and elevator space; transportation, traveling time, with too little park and play space, too much crowding and noise; creating frustration, sickness, insanity, suicide, dissipation, crime and repression. HUMAN SCALE. Businesses, cities to reduce to optimal size.

Our 16,000 toxic chemical dumps must be converted, so far as possible, to harmless - some useful substances, with cross-checked supervision of contained remainder. AMERICA THE POISONED. All future products must be harmless, or provision made for harmless conversion. We need extensive forestation, with tree varieties, to moderate rainfall, minimize floods and droughts, provide windbreaks, homes for varied wildlife, maintain wind and rainfall patterns, the vital interrelated balance of nature, and satisfy human interest in all life. Grass roots ombudsmen must supervise all vital matters, minimize useless and harmful projects, gross extravagance and graft; have the power, as in Sweden, to compel officials to obey the law, or introduce new legislation, where needed. This would prevent or redress enormous abuse of power by all branches of government, detention and relief agencies. THE GREAT ENERGY SCAM... - Big Oil's massive robbery and disruption of world economies. (Ultimately, what other monopolists don't take, landholders will, while land is underassessed, and held at speculative prices, so that producers will offer as much for sites as they can afford, leaving them a subsistence wage for each grade of skill, regardless of their production. PROGRESS AND POVERTY.)

*"The Authority of Education" "No More School"*

Medical testing must be done by mechanical means, saving annual torture of 64 million U. S. laboratory animals, and dangerous, often painful testing on prisoners, the insane, and some unwitting paying patients. All treatment of animals, for testing, work, shows, rodeos, movies, circuses, rearing and slaughter must require consensus approval by humane societies; many zoos to be replaced by preserves. SOCIETY for ANIMAL RIGHTS. Food to be grown naturally, as in THE ONE-STRAW REVOLUTION, without artificial fertilizers or pesticides; with crop rotation and adjacent varieties, to maintain fertility and minimize blight spread; near points of consumption, with low transportation cost and loss of nutrients, and with no harmful additives. We must adopt a vegan diet, suited to our digestive tract and nutrient requirements; cheaper, more nutrients per acre - vital to world food supply - saving infinite animal torture, in rearing and slaughter; with far less environmental and health damage. THE VEGETARIAN PHILOSOPHY.

Abolish capital punishment. ON CRIMES AND PUNISHMENTS. Replace detention, even the military, with money restitution, not to exceed actual damages, and reasonable ability to pay; government to make up deficiencies; with detention, under conditions as normal as possible, only for the emotionally dangerous (applying also to the mentally disturbed). Any suspect or prisoner who wishes, must be given a truth test by competent examiners, which will be accepted as evidence of innocence, degree of guilt, or abuse; the last warranting government restitution; collectible from officials or private citizens, if provable by usual means. Laws should be based upon Herbert Spencer's "Complete freedom, limited only by the equal freedom of others" - no sumptuary laws. Inexpensive mediation must replace capricious, discriminatory, far too expensive adversary law, effectively depriving the poor, minorities, and most others of anything resembling justice. "Heil Hitler!" or any salute is intimidating regimentation. Champ Clark: "There is precious little difference between a conscript and a convict." Frederick The Great: "If my soldiers would think, there wouldn't be a man left in the ranks." The national anthem at ball games, oath of allegiance, patriotic songs and prayers at AARP and other inappropriate meetings should end, as should a courtroom's rising, on entrance of a bought or biased judge.

DESCHOOLING SOCIETY uses the schools as a paradigm for the deregulation of all society. Compulsory schooling - slavery - must end, leaving students to study on their own, with parental help, in cooperatives, with resource centers, private accredited testing, no-strings subsidies; suited to individuals, with no unneeded or unwanted courses, faddist teaching methods, extravagant bureaucracy, dishonest teaching of health care, doctoring, nutrition, economics, history, the actual functioning of government, blind support for the status quo, and enormous waste of life, with consequent destructive effects. THE TWELVE-YEAR SENTENCE. We need COMPLETE social services, as required - housing, food and holistic health care - easily possible, with vastly greater general prosperity, better health and economical government. THE FEDERAL RATHOLE; THINK TANKS; FISHBAIT; THE SWEETEST LITTLE CLUB IN THE WORLD; ad infinitum. The federal tax, after the Civil War, came to only \$ 1 per person. Cancel the national debt - deterring war - an unethical shifting of current burdens to the future. No large national debt has ever been paid. Save \$ 100 billion interest. By also cancelling the \$ 75 billion pork-barrel, consultant fees, a few other wastes, the budget would balance, lowering interest, helping economies.

To eliminate monopoly control, eliminate campaign funds, allow candidates with required signatures free radio and television time, and newspaper space; with limited campaigning. Activist groups must support each other with political and economic boycotts, each advising in its own field; all perceiving their interrelated importance. Freedom to select one's work and residence, from a great surplus, is the economic keystone, while cooperation, through boycotts, is the political keystone to a HOLISTIC APPROACH: the latter necessary, to ensure the former. We are producing massive waste - warehouses filled with crates of bust developers; then empty crates, labeled "Bust Developers," according to GOD'S COUNTRY - destruction, poisoning, sickness, starvation, torture, slaughter, resource shortages - possible end to higher forms of life - for the profit and self expression of the spoiled few. Reviews of THE MOUNTAIN PEOPLE: *CE* "a people who have become monstrous almost beyond belief....instances of what has happened and is happening in our society come to mind...how fragile the structure of a society is." "a people who are dying because they have abandoned their humanity. The parallel with our society is deadly." IN THE SPIRIT OF CRAZY HORSE - Endless political, judicial, army, police, prison persecution, for massive theft by "the corporate state," leading to destitution of Indians. The power elite rob all; non whites easier. INDISPENSABLE ENEMIES.
